Dedicated Internet Access

Kalaam's Dedicated Internet offers businesses high-speed symmetrical bandwidth connectivity over our Wired or Wireless network which is an ideal solution for large companies that need a reliable service which is highly secure. Our connectivity is a fully managed service, allowing you to focus more on your core business.

Benefits

- High-speed, high-quality, high-capacity Internet service
- Redundant IP architecture offering premium performance to support critical business communications
- End-to-end reliability on our privately owned and managed fiber infrastructure

Features

- Access speeds of **upto 1 Gbps**
- Multiple last-mile connectivity through various technologies such as fiber and microwave.
- Redundant infrastructure in our core and distribution networks.
- Monitor your activity and performance reports through our web portal.
- Proactive support based on intelligent alerting system
- Bandwidth on Demand** - upgrade Internet connectivity to any higher speed by only giving a minimum prior notice to Kalaam

Business Broadband

Kalaam provides businesses with an efficient and cost-effective broadband solution. We provide convergent packages which tackle different aspects of your daily operations providing both internet and voice services with a range of options to suit your requirements.
